DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84 (p) (4) because reference character "502" has been used to designate both matrixes in Fig. 5. Corrected drawing sheets are required.

Allowable Subject Matter

2. Claims 1-12 allowed. The following is a statement of reasons for the indication of allowable subject matter:

The claims state limitations or steps of creating a cost matrix.

On page 5, lines 6-10 and in the response filed 1/10/2005, applicant states, " The application-specific strategies can be viewed as criteria for determining how valuable or desirable it is to assign a particular resource to a particular item. The score resulting from applying the strategy represents the value based on applying that strategy or criteria".

Applicant details the creating of a cost matrix by:

Identify one or more assignment strategies for assigning one or more resources to one or more items, for each assignment strategy, determining an assignment score for each item/resource pair, summing the assignment scores for each item / resources pair, and multiplying each

assignment score sum by an assignment cost associated with the sum's corresponding item / resource pair to produce a cost matrix.

The prior art does not teach applicant's defined steps for creation of a cost matrix.

U.S. Patent 5,963,911 teaches a cost matrix but did not teach the creation being performed by summing of the assignment scores for each item/ resource pair as defined in the specification and "multiply the sums by a assignment cost to generate a cost matrix".

U.S. Patent 5,195,170 teaches summing assignment scores for item/ resource pairs based on a assigned strategy but does not teaches the step of "multiply the assignment cost to the summed item / resource pairs to generate a cost matrix".

Therefore, the claims are allowable for at least these reasons above.
